# Safeguard: The competitive edge for Mercedes-Benz Van owners.

Mercedes-Benz

## Safeguard Benefits

Safeguard is that extra competitive edge Mercedes-Benz provides for its van owners.

Safeguard makes unexpected operating costs a thing of the past, allowing you to budget for maintenance and repairs according to a pre-determined schedule and agreed costs.

All work is performed by authorised dealers and each Safeguard van is assigned an individual identification code so its service history, performance and specific needs are available to your authorised dealer.

The benefits of Safeguard include:

- **Pre-determined agreed costs:** Structured monthly costs avoid unexpected service and repair bills.
- **National backup:** Safeguard is supported by a comprehensive network of parts and service professionals.
- **Operational reliability:** Minimises costly unscheduled down time.
- **Higher resale value:** A complete service history increases the resale value of your van.
- **Genuine parts and service:** Guaranteed use of only genuine parts and service delivers high standards and maximises reliability.
- **Peace of mind:** Business operators and drivers know their vans are supported 24/7 by the authorised national dealer network.
